9 March 1966

Dear George:

SUBJECT: Contract   
Status Report  
Coherent Enlarger Evaluation Program,  
Support Activities

STAT

During the month of February two trips were made  for the purpose of refining the alignment of the enlarger optical system and film platen. At the second trip, specially made test equipment and a multiple target were put to use and the job was completed. Photographic runs were made to verify alignment and enlargements from these photographic runs were sent  for their records.

STAT

STAT

No discussions relating to the enlarger were held between  our facility. However, there is presently in progress an effort to arrange a meeting between all interested parties to discuss various aspects of this program.
